

# Disaster Survival Solutions LLC

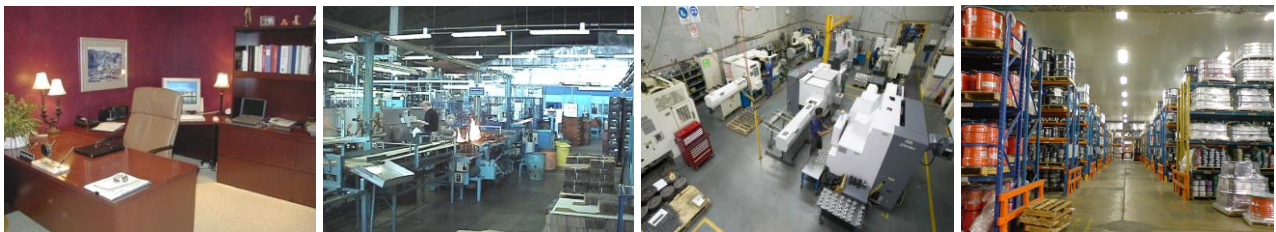

437 Rozzi Pl., Suite 112  
South San Francisco, CA 94080  
Tel. 650 589-8533 Fax 650 589-8557

*You have Fire Insurance, Business Insurance, and Health Insurance.... But what poses the greatest threat to your Ongoing Business in the San Francisco Bay Area?*

## Prevent Avoidable Earthquake Damage

Office - Manufacture - Service - Distribution - Retail - Wholesale - Laboratory - R&D

**Mitigating Downtime and Loss! Safeguarding Your Livelihood from Earthquake Damage**

### *What Do You Have To Gain with this Service?*

- Reduce the impact to your business in the event of an earthquake.
- Quicker recovery time and operations resumption time.
- Protection of raw materials, goods in progress, inventory, and finished goods.
- Reduce loss of income.
- Improve worker safety.
- Studies show, when workers know you are taking precautions on their behalf, productivity rises.
- Fast recover can increase market share.
- Improve up line confidence on deliverables.
- Greater overall building safety can reduce insurance costs.

### *Get A Photographic Survey of Your Facility with Recommendations*

Do you know where the earthquake dangers are in your facility?

- We will survey every part of your operation and produce a photographic and detailed survey on how to make your business more disaster secure. This document will combine the pictures from our survey with detailed recommendations on securing each item or area.
- We provide an estimated quote for doing the securing work. We can break down the estimate by sections. You choose what to do, and what to spend.
- **You own the roadmap.** You can have us do the work or use the roadmap to do the work in house or with your favorite contractor! But either way, you will know what needs to be done.

## *What We 'Tie Down' In Your Business*

- Machinery - We will lift and place heavy machinery on floor anchor bolts or use tightening fasteners.
- Pallet Racks - We bolt, anchor bolt, strap, or secure to wall.
- Shelving - We bolt, anchor bolt, strap, or secure to wall.
- Offices – We secure desks, bookcases, pictures, electronics, file cabinets, etc.
- Inventory - Shelved, boxed, loose, crates, bagged, etc. We will secure it in place.
- Technical Machinery - Small technical machinery: gauges, meters, etc., can be very expensive to replace. Often, these items need to be moved about during the work day. We will put in place holding straps, ties, or clamps to lock these items down when not in use. If your shop is not 24 hours, then the chances are that an earthquake will occur during off hours and every valuable item should be locked down during down times.
- Raw Materials - Regardless of the type of material you use in process, there is a way to store it more safely.
- Goods in Process - Your Company has man-hours behind every good in process item. We will show you how to keep those items safe as they move through your process. These items should always be secure, especially during down hours, we will show you how.
- Your Special Need Items - No other company does what you do? There will be a way to secure your special need items, we will find it!
